

6. The biodegradable plastic composition according to claim 1, characterized in that said carbodiimide compound (B) is aliphatic polycarbodiimide.

7. The biodegradable plastic composition according to claim 6, characterized in that said aliphatic polycarbodiimide compound has an isocyanate terminal.

8. A molded article of a biodegradable plastic obtained by molding the biodegradable plastic composition according to any one of claims 1 to 7.

9. The molded article of the biodegradable plastic according to claim 8, which is in the form of molded article, extrudate, blow-molded article, thermally molded article, fiber, non-woven fabric, film or sheet.

10. A method for controlling biodegradation rate of a biodegradable plastic, characterized in that a biodegradable plastic (A) is compounded with a carbodiimide compound (B) and at least one compound (C) selected from the group consisting of benzotriazole-, triazine- and hydroxylamine-based compounds in such a way to adjust its biodegradability.
